# THE IMPORTANCE OF RESPIRATORY PROTECTION

Ensuring the safety of individuals in environments where they are exposed to harmful inhalants is paramount. Failure to protect the respiratory system from irritants, particles, chemicals, and viruses can lead to severe consequences such as illness, fatalities, or permanent disabilities.

In today's workplaces, prioritizing safety isn't just a moral obligation but a legal requirement. Adherence to strict health and safety standards is imperative to avoid potential liabilities.

Selecting appropriate masks tailored to specific environments is crucial, as is ensuring compliance with rigorous quality and safety regulations consistently.

# CHOOSING THE RIGHT MASK

Various work environments place different demands on a face mask, from simple dust filtration to hazardous materials to protection from airborne viruses. Hamsun offers a risk assessment service to advise our clients on the proper respiratory protection for their needs.

It is recommended to conduct a hazard assessment to identify potential risks and how they can be mitigated by protection classes, then move onto considerations such as fit and comfort.

Basic protection against  
non-toxic  
solid and liquid particles

**4X VALUE**

**FFP1**

Intermediate protection  
against  
hazardous and harmful vapor  
and  
smoke particles

**10X VALUE**

**FFP2**

High protection against  
poisonous  
particles, vapor and smoke, solid  
and liquid aerosols

**30X VALUE**

**FFP3**

## RESPIRATORY PROTECTION RANGE

---

### 2001 Econo

**Protection & comfort of a premium mask. Protection against solid and liquid non-volatile particles that offers a snug fit and seal through our unique flat design is both flexible and comfortable.**

### 2002 Eco/Valve

**The exhalation valve eases the action of breathing out, reducing both heat and moisture in the mask. Protection against solid and liquid non-volatile particles.**

### 3001 Econo

**Offers the protection and comfort of a premium mask against solid and liquid non-volatile particles. Better fit and seal through concave design that is both flexible and comfortable.**

### 9200 Premium

**Premium soft, snug fit and seal through unique flat design is both flexible and comfortable. Engineered to bring you the ultimate in Respiratory Protection .**

### 9201 Pre/Valve

**The exhalation valve eases the action of breathing out, reducing both heat and moisture in the mask. Premium soft, snug fit and seal through unique flat design .**

# U-MASK

## RESPIRATORY PROTECTION RANGE

### 9300 Pre/Valve

Protection against solid and liquid non-volatile particles, bacteria, and viruses. Snug fit/seal through unique flat design. Exhalation valve eases the action of breathing out, reducing heat and moisture.

### 9202 Carbon

Provides protection in various environments against solid and liquid non-volatile particles. Snug fit and seal through unique flat design. Perfect mask for various types of welding, areas with gases and vapours.

### 9400 Car/Valve

Carbon self-extinguishing, flame-retardant, half-face seal, providing protection against solid and liquid nonvolatile particles. Exhalation valve reduces both heat and moisture in the mask.

### 9400 Pro-Weld

Carbon self-extinguishing, flame-retardant, full-face seal, providing protection against solid and liquid nonvolatile particles. Moulded cups offer better fit/seal through a design that's flexible and comfortable.

### 5000 Premium

Specifically designed to provide ultimate protection against viruses and particles in high contaminated areas, including solid and liquid non-volatile particles.
